Localization XLPE cable defects with damped AC (DAC) voltage technique is suitable for medium-length cable (1000m~3000m), however, the precision decreases when the cable is shorter than 500m. For it is hard to distinguish the incident and reflected pulses in time using time domain reflectometry (TDR) with high oscillating frequency. To solve the problem, a compensation ...

Industries and applications that benefit from implementation of CalRamic capacitors include: Commercial/Industrial Power Supplies, Military Avionics, Radars, Sensing, High Temperature Geophysical, Geothermal, and High Temperature Electronics.

A Class 1 ceramic capacitor is the best choice for applications that demand low losses and high stability. This style provides a reliable capacitance within the designated range of frequency, temperature and voltage. Class 2 series offer higher capacitance, but have ...
