This 0.22uf 275V AC Box Capacitor is designed with high reliability and long life (12000 hrs) with high ripple current at high frequency and excellent smoothing ability.

A DC Box capacitor designed with polypropylene dielectric with double metalized polyester film as electrodes. The two leads come in parallel with the body of the capacitor. These leads come out at the same ends of the capacitor. Meanwhile, these capacitors are encapsulated in thermosetting resin in a rectangular box of material meeting the ...

The start capacitor in a motor control box is considered a consumable part. Capacitors tend to lose capacitance over time and/or use, and need to be replaced when the capacitance drops below the described range. This start capacitor is for Franklin 3HP Standard Control Box 2823028110, Deluxe Control Box 2823028310 and other control boxes that ...

A decade box lets you select a specific resistance (or capacitance) within the range of the unit you build. In most cases you'll need five decades, with full-range resistances of 900, 9000, 9kO, 90kO, and 900kO. This allows you to set any ...
