Mini Type C Micro USB TP 4056 1A Charging Module: Efficient Charging Solution for 18650 18500 3.7 Volt Lithium Ion Batteries The TP4056 is a commonly used lithium-ion battery charging module designed to charge single-cell lithium-ion or lithium-polymer batteries with a nominal voltage of 3.7V. It's widely utilized in v

TP4056A module is most commonly used with all projects involving a Lithium-ion battery. As we know a lithium battery should not be overcharged or over discharged, hence this module will monitor the voltage level of the battery during charging and discharging. If the values go beyond critical value the module will automatically disconnect the circuit and protect your battery.

Model Number: A2425 PowerSolarFlex 3-Port 24W The Flexible, Durable, and Portable Solar Panel Rugged Yet Flexible Constructed using ultra-thin CIGS solar cells, PowerSolar is flexible enough to fit effortlessly in your bag while still offering enough durability to survive the rough and tumble of your next outdoor adventure. Power 3 Devices at Once The ...

Disconnect Terminals to Preserve Charge. Before storing in the off-season, fully charge the battery, disconnect the terminals, and turn off the power source. To ensure your batteries are maintained throughout the year, charge them with a battery maintainer/charger if there is power at your storage location.

Lithium-ion battery modules have many advantages over traditional lead-acid batteries. They are lighter, have a higher energy density, and can be discharged and recharged more times of a rechargeable battery than lead-acid batteries. Lithium-ion battery modules also have a lower self-discharge rate, meaning they will retain their charge for longer periods of time.
