Datakom DKG series Automatic Transfer Switch controllers are designed to monitor 1-3-phase mains voltage, send remote start command to generating sets and control the changeover of both generator and mains contactors. There are many different features in Datakom ATS control panels including uninterrupted transfer with mains synchronization, MODBUS interface, ...

An automatic transfer switch acts as a critical intermediary between primary utility feeds and onsite backup power sources like generators or solar paneling. They continually monitor grid power status. At the first electrical disturbance indicating utility failure, ATS immediately triggers backup systems to start supplying alternative electricity.
