How to Fix Battery Charging System. If you get a sensor reading that says "service battery charging system," there are several options to pursue. You can: Check the main battery and remove ...

It sat for a day or two after a PCM recall, so I was going to check the at rest battery voltage with a meter and then fire the ole gal up and the charging system. I found a loose negative terminal at the battery. "Trust but verify" as I believe the saying goes

They were about to order a full harness and charging controller, but were told to try one last thing. Turns out there was a fault in the epcm and the fix was to de-power the charging system, re-download and install the latest software (it already had the most recent updates, so they just reinstalled it) and fire it back up!"

A faulty charger or charging port, a dead battery, outdated drivers or firmware, incompatible power management settings, overheating, and physical damage are all potential culprits that can disrupt the charging process, leaving the battery stuck at 0%.

The Service Battery Charging System warning message is a common issue encountered in the Cadillac SRX, and many other modern GM vehicles. When this message appears, it indicates that there is a problem with your SRX's charging system that needs immediate attention many cases, you might also notice an amber, yellow, or red ...

I had a "Service Charging System" error message also. 14.5 volts at the battery when idling, guage on dash is fine: 14+ volts. But the message would return after the first 5 minutes, about every 30 minutes of driving after that.

ECU. These units take part in the process of charging the battery in your Equinox. The ECU sends the needed signals to all control units and modules, the alternator produces the electric current with a certain voltage, the wiring sends this current directly to the battery, and the battery itself gets the charge and holds it.

The light warns of issues with your car's battery and charging system. The Service Battery Charging System (SBCS) is made up of your car's battery, alternator, wiring, and electronic control unit. ...
