

Battery trading case in the Balkans

Large battery storage projects in Estonia and Latvia have moved forward as the Baltic energy system prepares to decouple from Russia in 2025.

in the Balkans and does not want to do so. Instead, Beijing hopes to use the Balkans as a gateway to the EU through which its influence, trade, and investment in the union can flow. In this way, China hopes to gain an advantage in its larger, global competition

After the COVID-19 crisis, the economy revived, but energy intensity remained at a high level, which pointed to the need to diversify the energy mix and supply sources. As the energy sector is the largest emitter of carbon dioxide [], and the economy itself is more energy-intensive than the EU average [], the countries of the Western Balkan region are looking for a ...

Immediately after the breakup of former Yugoslavia, the US has emerged as the single most important external actor in the regional dynamics of the Balkans. Using NATO as a vehicle, in strategic terms, it became a security overlay; the Kosovo war being a peak of its...

A case in point: air pollution is an acute public health concern in the Balkans, especially in Kosovo and North-Macedonia. If the hazard of particulate matter and other air pollutants and toxins (such as nitrogen-oxides and sulfur dioxide) is significantly addressed by the carbon pricing scheme, climate change mitigation efforts would yield considerable co-benefits.

A critical aspect is the burgeoning demand for lithium-ion batteries and the massive amount of minerals and ... As is the case with trading conditions, the three countries also have dissimilar contexts. Argentina has the fourth-highest bilateral debt (US\$17.1 4 ...
