pole-mount capacitor rack solution that meets the needs of electric cooperatives and public power utilities. Our Express capacitor banks are designed to simplify the ordering process by providing easy selections for customers, and covering most of the common requirements for a pole mount power factor correction solution.

Pole-mount power factor correction capacitor banks, whether switched or fixed, are supplied on self-supporting aluminum racks. Six-position rack comes standard even if only three capacitors are required, thus allowing the customer to expand the capacitor bank in the future by merely inserting the additional capacitors.
