There are multiple ways that ceramic capacitors can malfunction and some are: 1. Cracking of Ceramic Capacitor: Ceramic capacitors may undergo mechanical cracks due to too much physical stress i.e., bending of the board or pressure on the part. This excessive bending can develop short circuits between layers.

The most common design of a ceramic capacitor is the multilayer construction where the capacitor elements are stacked as shown in Figure 2, so-called MLCC (Multi-Layer Ceramic Capacitor). The number of layers has to be limited for reasons of the manufacturing technique. The upper limit amounts at present to over 1000.

Its robust construction allows for reliable operation over time. It's made from a material called dielectric, which is usually ceramics such as barium titanate, aluminum oxide, or titanium dioxide. Ceramic capacitors are commonly used in applications where small size and high capacitance values are needed along with an ability to handle high temperatures and ...

Class 2 ceramic capacitors built with BaTiO<sub>3</sub> dielectric (X7R, X5R, etc.) exhibit a substantial decrease in capacitance value under increasing DC bias. A comparison is shown in Figure 5 for several different ceramic capacitors. To reduce the influence of DC bias, ceramic capacitor manufacturers use different kinds of rare metals to adjust BaTiO<sub>3</sub>

Multilayer ceramic capacitors (MLCCs) are generally the capacitor of choice for applications where small-value capacitances are needed. They are used as bypass capacitors, in op-amp circuits, filters, and more. Advantages of MLCC include: Small parasitic inductance give better high-frequency performance compared to aluminum electrolytic ...

This is due to the long-term reliability of ceramic capacitors and the excellent environmental and insulation resistance provided by the epoxy resin used in the exterior coating. Taking advantage of this feature, leaded MLCCs have also been adopted in applications with the goal of securing the insulation distance required by IEC/EN standards.
