

# China Real Estate Solar Project

By the early 2000s, Sun controlled 60% of all real estate in Beijing and had acquired dozens of state-owned firms, more than any other private enterprise in China, according to Millward's book.

Um, usually you see it with solar, the wind projects, um, you know, can also incorporate the energy storage system as well. Um, what's interesting about it is that, you know, the lives of the energy storage system are nearly as long as the expected economic useful life of a renewable energy system.

Thousands of real-estate projects in China are set to receive funding under Beijing's new "whitelist" financing program, as policymakers intensify efforts to rescue the property sector from ...
