China's share of global manufacturing at every stage of solar panel production exceeded 80% of the global total in 2022, according to Rystad Energy. The findings are presented in the Norway-based research and business intelligence company's Solar Market Report 2023.

China manufactures 80 per cent of all the solar panels produced globally. And, as the IEA notes, China's dominance is even more pronounced when one examines the entire supply chain.

In November 2023, the export value of Chinese photovoltaic products continued to decrease. The combined export value of solar rods, solar wafers, solar cells, and PV modules in November was \$29.32 billion, marking a 23.2% decline compared to November 2022 and a 5.1% decrease from October 2023. Among these export figures, solar panels ...

China's dominance in the solar panel market has led to a global oversupply, resulting in plummeting prices and excess inventory. The abundance of Chinese-made solar panels has become so significant that people are now repurposing them as fencing material in countries like Germany and the Netherlands.
