The UX 300e offers a 196-mile driving range on a full charge, thanks to its 54.3kWh lithium-ion battery and single electric motor. Its maximum charging speed of 50kW is on par with its current rivals like the Kia e-Niro, but far behind others like the Mercedes EQA and Peugeot e-2008, which are capable of charging at 100kW. Meanwhile the similarly priced Kia ...

The standard Model 3 comes with a single-motor electric powertrain with a 50.4-kWh battery pack, rear-wheel drive and a maximum driving range of 272 miles. The Long Range and Performance models both offer a dual-motor all-wheel-drive setup with a 75-kWh battery pack and maximum driving ranges of 341 and 315 miles, respectively.

Electric vehicle (EV) battery prices are expected to fall by almost 50% by 2026, according to Goldman Sachs Research. This significant price drop could make the overall cost of owning an EV similar to that of petrol (or) diesel powered cars. Two main factors are driving this change: new technology and falling prices of battery metals. Recent ...

When battery chargers and testing equipment need a new set of clamps, the BAF-C50 from Schumacher Electric is the perfect go-to replacement. These clamps are color-coded in red and black, making it easy for users to attach the clamps to the correct polarity so the currents are never reversed when charging.
