In Cyprus, however, we use the British Type G socket, which features three rectangular pins. This means that most people (except those from the UK) will need a power adapter to charge their phones or laptops. Despite this discrepancy, keep in mind that the voltage across Europe (including Cyprus) remains consistent, hovering around 220-240V ...

For your peace of mind, we guarantee the battery in your electric hybrid for six years or 100.000km - whichever comes first. And while it's under warranty, our EV experts will fix any manufacturing defects free of charge. In fact, the rare occurrence of a battery issue is generally caused by a single cell. The module containing this cell ...
