The MEGATRON 1MW Battery Energy Storage System (AC Coupled) is an essential component and a critical supporting technology for smart grid and renewable energy (wind and solar). The MEG-1000 provides the ancillary service at the front-of-the-meter such as renewable energy moving average, frequency regulation, backup, black start and demand response.

Storage capacity: This indicates how much energy a battery can hold and is measured in kilowatt-hours (kWh). A kWh is a measure of how much energy you use. It's equal to the amount of power you'd use if you kept a 1,000-watt appliance running for an hour. So a 2,000-watt oven would use one kWh of energy in 30 minutes of operation.
