requirements are provided as notes where appropriate. Notes: 1. The new standard AS/NZS5139 introduces the terms battery system and Battery Energy Storage System (BESS). Traditionally the term batteries were used to describe energy storage devices that produced dc power/energy. However, in recent years some of the energy storage

Energy Commission (CEC, formally titled the State Energy Resources Conservation and Development Commission) to adopt and implement standards. The Building Energy Efficiency Standards (Energy Code) were first adopted in 1976 by the CEC and have been updated periodically since then, as directed by statute.

The NFPA writes all of these codes and standards through a process that's approved by the American National Standards Institute (ANSI). This rigorous development of standards makes the NFPA a common source for regulators studying fire safety issues, but NFPA codes and standards are not themselves legally binding in the U.S. or abroad.
