

Tesla Energy is the renewable energy division of Tesla and within it are two business units. It competes closely with rival Sunrun for the mantle of being the largest installer of residential solar power systems. It is the manufacturer of the Tesla Powerwall 2, arguably the leading residential energy storage solar battery solution on the market.

The first part is the power optimizer, which handles DC to DC and optimizes or conditions the solar panel"s power. There is one power optimizer per solar panel, and they keep the flow of energy equal. For example, with a standard string inverter, if one solar panel produces less energy, all the solar panels in that string will produce less energy.
