

Finland telecoms firm Elisa has received EUR3.9 million from the government to form a VPP using batteries, potentially the largest in Europe. ... The company will put the funding towards a rollout of its Distributed Energy Storage (DES) solution across its network with an expected total energy storage capacity of 150MWh. This article requires ...

A modular and scalable fast-charging power source for electric cars, electric commercial vehicles and electric off-highway vehicles. Coupled together with the Kempower Satellites, Pantographs or Control Units, it creates a charging solution for every need. The solution's dynamic power management enables a unique way of delivering power across all ...

Energy-Storage.news recently interviewed one of the leading optimisers in the UK and Australia markets, Habitat Energy, about the challenges for firms like it (Premium access). Energy-Storage.news" ...

The project, called Vantaa Energy Cavern Thermal Energy Storage (VECTES), will involve caverns around 60 metres underground in bedrock. According to project overview documents produced by Vantaa, situating the water storage that far down means the ground water"s natural pressure will prevent it from evaporating, even at ...

German solar-powered car firm Sono Group (NASDAQ:SEV) on Tuesday said it has signed a binding term sheet to produce its Sion solar electric vehicle at Finnish contract manufacturer Valmet Automotive. The car will be produced at Valmet Automotive's plant in Uusikaupunki, starting in the second half of 2023. The contract manufacturer ...

Finland telecoms firm Elisa has received EUR3.9 million from the government to form a VPP using batteries, potentially the largest in Europe. ... The company will put the funding towards a rollout of its ...

Tesla, Inc. is a leading electric vehicle (EV) manufacturer and clean energy company founded by Elon Musk, JB Straubel, Martin Eberhard, Marc Tarpenning, and Ian Wright in 2003. Tesla is known for... Tesla is known for its innovative electric cars, energy storage solutions, and solar products.

In this study, through the use of case studies, expert interviews, and a survey, we determined the current state of the EVB CE in Finland, the possible options for utilizing EOL vehicle batteries ...

EV startup Lightyear has announced a letter of intent with contract manufacturer Valmet Automotive as a production partner of its upcoming Lightyear One solar electric vehicle (SEV).

The energy equivalent of as much as 1.3 million electric car batteries and could heat a medium-sized Finnish city all year round. A seasonal thermal energy storage will be built in Vantaa, which is Finland's fourth largest

city neighboring the capital of ...

Headquartered in Helsinki and listed by Financial Times among the fastest growing companies in Europe, Virta has built an electric vehicle charging platform covering over 30 countries trusted by over 1 000 business-to-business clients. Virta's goal of accelerating the global transition to sustainable mobility by empowering large enterprises ...

Developers Taaleri Energia and Merus Power have partnered to deploy a 30MW/36MWh battery energy storage system in Finland, one of the country"s largest. The two will oversee the development of the battery storage system in Lempäälä in the southern municipality of Pirkanmaa, near Tampere, which will support the local electricity grid. ...

vehicle manufacturer that does not produce batteries, depending on the external battery . manufacturer. Only if the acquisition cost is reasonable, ... energy storage system. 2.

Fortum, a Finnish majority state-owned energy company, is shaking up the value chain for industrial and electric vehicle batteries with a low-carbon dioxide recycling solution capable of utilising up to 80 per cent of batteries, thus ensuring cobalt, lithium, nickel and other scarce metals are returned to circulation from end-of-life products.

Finnish startup Polar Night Energy is teaming up with a district heating company to construct an industrial-scale thermal energy storage system in southern Finland. The sand-based system will use ...

The money will go towards productising the firm"s enclosure system into second and third iterations, certify its product to thermal runaway test certification UL 9540A and its manufacturing facility to UL 1974, a certification specifically for second life energy storage systems (ESS), he added.. Its current product, MOAB, is a 250kW/500kWh ...

Swiss investment fund and project development vehicle MW Storage has contracted Fluence to supply and integrate a 20MW battery storage asset in Finland. The project will be a 1-hour duration ...

BESS pricing moves . The deal for a 38MW/40MWh system to be deployed in Lappeenranta was announced in early February, with the project owned by a joint venture between Ardian and utility Lappeenrannan Energia.. The announcement followed a period of sustained decline in the global price of BESS, according to data from Clean Energy ...

The majority of the homes in Finland's fourth most populated municipality are hooked up to the city's 600-km-plus (373-mile) underground district heating network, where hot water is pumped through ...

A huge sand battery is set to slash the carbon emissions of a Finnish town. The industrial-scale storage unit in

Pornainen, southern Finland, will be the world"s biggest sand battery when it ...

Vantaa Energy plans to construct a 90 GWh thermal energy storage facility in underground caverns in Vantaa, near Helsinki. It says it will be the world"s largest seasonal energy storage site by ...

See below for Finnish. Suomeksi alla. The world"s first commercial sand-based energy storage system, or "sand battery," has officially been inaugurated in Vatajankoski, Kankaanpää on January ...

Hitachi ABB Power Grids, formed by combining the capabilities of the Japanese and Swiss technology and engineering groups Hitachi and ABB, has deployed more than 600MW of battery storage worldwide. Energy-Storage.news has reported on energy storage projects and activities by the company around the world with varied ...

Valmet Automotive has announced to expand its car plant in Uusikaupunki, Finland, into a battery factory. Besides Salo, Uusikaupunki will become ...

Telecoms firm Elisa Corporation has signed a contract to bring its distributed energy storage (DES) solution to Finnish mobile networks. The deal, with Helsinki-based cellular infrastructure construction and maintenance provider DNA Tower, will use the backup battery energy storage system (BESS) capacity of mobile networks to ...

Valmet Automotive has officially opened its Uusikaupunki, Finland battery plant, marking the start of production of high-voltage automotive battery modules and battery packs, part of a significant ...

Renewable energy has been on the rise in Finland; renewable energy accounts for 50.76% of total final energy consumption where bioenergy, hydropower and wind power were the major renewable production methods. As a result, the share of fossil fuels in the total energy supply dropped to 36%, which is significantly lower than the IEA ...

A part of Urban Tech Helsinki, an incubator for clean and sustainable urban solutions for smart cities, Greenele is currently running a few pilots in the Finnish capital ...

Neoen (ISIN: FR0011675362, Ticker: NEOEN), one of the world's leading producers of exclusively renewable energy, has provided notice to proceed to battery storage expert Nidec, signalling the start of construction of Yllikkälä Power Reserve Two (YPR2). Nidec will have the overall responsibility of the construction project and will ...

The DES solution also enables the batteries" stored energy to be aggregated into a virtual power plant, accessing the Nordic grids" frequency regulation ancillary services markets which have become an attractive

opportunity for large-scale battery energy storage systems (BESS) with Sweden and Finland leading ...
