Except the Fuze uses a Lithium-Polymer battery, not the Lithium-Ion as was used in the e200 series players. The Li-poly is like the Li-ion on steroids. Longer run time and more charge/dis-charge cycles throughout it's expected life.

Inside the li-poly battery is a small circuit board that contains a microcomputer IC that controls/monitors the battery charge. The blue wire goes from the controller board to the player. Message Edited by 14124all on 10-08-2009 10:12 AM . Theres actually no IC inside the Fuze's battery.

If my Fuze battery lasts five years, I suspect I'll have bought another DAP before then and will have enjoyed the slim form factor that the custom battery provides. george_w December 27, 2008, 12:40pm 3. You right the battery is not replaceable in the Fuze! I am hoping for 3 to 5 years out of the battery on our units.
