electronics industry in 1977. Over the years the focus shifted and Alcon Electronics now manufactures a large range of high CV screw terminal Aluminium electrolytic capacitors and a large variety of film capacitors for power electronics.

Capacitors are passive electronic components that store electrical energy. Basic capacitors, formerly known as condensers, consist of two parallel plates - one positive and one negative - separated by a dielectric (nonconducting) material. The plates may be square, rectangular, cylindrical, or spherical, resulting in several possible designs and form factors.
