Step 4: Pre-fit The Solar Panel on The Van Roof. Hoist the van solar panels onto the camper van and mark their exact location. You should also mark the positions where the main cables from the panel will pass through. When you're done, remove the solar panel and drill holes on the previously marked positions for the main cables.

Inconspicuous Solar Panels . In the not too distant future, solar panels may be as inconspicuous as windows. A number of companies are working on developing thin, efficiency solar cells that can be applied directly to surfaces like glass. The result would be a building with an exterior that generates electricity from the sun while still allowing in natural light.

Another option, recommended by the experts at Solar Power Authority, is to use solar enabled native building materials, such as solar shingles, instead of external panels on the roof of your house. Because solar shingles are specifically designed to blend in with a roof as normal shingles would, they do not stand out in the same way. Solar ...

Can You Hide Solar Panels? When most people think of solar panels, they envision large, blue rectangles mounted on rooftops. However, it is possible to hide solar panels so that they are less visible. One way to do this ...
