Mounting the Solar Panels: Our team securely installed the solar panels on the roof, ensuring optimal orientation and tilt for maximum sunlight exposure. Connecting the Inverter: We connected the solar panels to a hybrid inverter, which converts the DC electricity generated by the panels into AC electricity compatible with the grid.

How are solar panels connected to the house? First, the panels on your roof capture daylight and convert it into DC (direct current) electricity. This electricity is still in a form your house can't use, so it goes through an inverter that transforms it into the AC (alternating current) electricity we use at home. This usable electricity is sent through your home's ...
