I had intended on hooking it up to my electrical panel via generator plug inlet box and interlock kit, but after doing some research I've come to realize I've got a complex problem. ... Adding critical-loads sub-panel with a PV install, rationale and ampacity calculation. 0.

Solar panels can generate electricity throughout the whole day, running optimally during periods of direct, uninterrupted sunlight. The average solar panel power output during the day is equivalent to the PV modules generating 4 - 8 hours of power at maximum efficiency. The total power output for panels can vary depending on the solar index ...
