Over 2.5GW of grid-scale battery storage is in development in Ireland, with six projects currently operational in the country, four of which were added in 2021. The operational use of the already-installed capacity of grid-scale battery storage was displayed in May 2021, when the frequency of Ireland's electricity grid dropped below normal operating range.

Batteries are perhaps the most prevalent and oldest forms of energy storage technology in human history. 4 Nonetheless, it was not until 1749 that the term "battery" was coined by Benjamin Franklin to describe several capacitors (known as Leyden jars, after the town in which it was discovered), connected in series. The term "battery" was presumably chosen ...
