To discharge the battery, the polarity is reversed, and the iron dissolves back into the saltwater solution. By carefully managing this process, the iron-flow battery is able to achieve a significantly longer battery life of 20,000 cycles or more, compared to 3,000 to 4,000 cycles for lithium-ion batteries, without degrading over time.

With EEP Africa financing, Zembo launched 200 electric moto prototypes and constructed 19 solar charging/battery swap stations in Kampala to pilot and validate the technology and payment solutions. Outcome and Impact. The project provided an alternative to the large fossil fuel-based "boda-boda" market, which is a major contributor to ...

Plot 128 Old Kira Road, Opposite White Flats Bukoto. P.O. Box 26659, Kampala - Uganda

We offer Lead Acid/Powdered Automotive Batteries in a wide range of varying capacities from as low as 36AH to a high of 200AH all designed to cater for the varying needs of our clients. Read ...
