If your 12V battery charger shows a charging voltage you can expect it to be around 14.0 to 14.8V for a typical Flooded lead-acid battery. If you have a 12V battery monitor (the best 12V Bluetooth battery monitor are the BM6, followed by the BM2), you may be able to see the voltage of the battery while you drive, or while the engine's running that case, it'll typically move up ...

The lead-acid battery is a type of rechargeable battery first invented in 1859 by French physicist Gaston Planté; is the first type of rechargeable battery ever created.
