Connect your new 25Ah lithium, LiFePO₄, LFP aluminum shell battery pack together in parallel (neg to neg and pos to pos) for more than 8 hours before connecting in series and charging. This gives your new batteries time to balance their voltages. It is also strongly suggested that you use a BMS or balancing system.

The shell materials used in lithium batteries on the market can be roughly divided into three types: steel shell, aluminum shell and pouch cell (i.e. aluminum plastic film, soft pack).
