MYANMORE inspires and enables people to explore and enjoy the best of Myanmar. It started in 2013 when MYANMORE launched the Weekly Guide to share What's On. Since then, this iconic brand has consistently maintained its status as the go-to source of inspiration for both locals and visitors alike.

Organic solar cells (OSCs) based on polymer donor and non-fullerene acceptor achieve power conversion efficiency (PCE) more than 19% but their poor absorption below 550 nm restricts the harvesting of high-energy photons. In contrast, wide bandgap all-inorganic perovskites limit the absorption of low-energy photons and cause serious below ...
