Discharge as Recommended: Depending on the specific type of lithium battery, the recommended discharge level before storage may vary. Some batteries, such as lithium polymer (LiPo) batteries, should be stored at a partially discharged state (around 40-60% of capacity) to maintain their health during long periods of inactivity. ... For example ...

The difference between Lithium and Lithium Ion is the fact that the Lithium Ion can be recharged. The downside is that the Lithium Ion doesn't last as long and will lose its charge even if it's not being used. Hence, for the outdoor cameras it's best to stick with the recommended Lithium batteries.IMHO.
