The MLR series is a range of radial lead, non-inductive, non-polarized polyester film (Mylar) capacitors dipped in a hard epoxy coating material to provide excellent protection against moisture. These devices are intended for general purpose DC applications. The MLR series is a range of radial lead, non-inductive, non-polarized polyester film ...

Film capacitors are based on the use of plastic film materials as a dielectric. An electrostatic (non-polarized) capacitor type having generally favorable parameter stability and loss characteristics relative to other types, a wide variety of construction and material variations exist that allow film capacitors to be adapted for a wide range of purposes, ranging from small-signal applications ...

Learn about the construction, properties, applications, and key differences of polyester and polypropylene capacitors. Compare their advantages, disadvantages, and suitability for ...
