My MX Master's battery life has been slowly dwindling. I made the mistake of not verifying my original battery's dimensions, roughly 1" x 1.25", about a third of the size of the replacement I ordered. Was still able to swap batteries (from 500mah to 1150mah) by swapping connectors and removing the battery holder compartment.

The battery pack used in Figure 3 is typical of that found in many other battery-operated devices. It consists of several battery cells connected in series plus a ...

Loosen and remove these three bolts. Along the front edge of the battery box, you'll see one additional bolt holding the box to the transmission mount housing. Once removed, you will be able to lift the battery box up slightly. Underneath the battery box, you'll see a series of zip ties holding the positive cable to the front of the battery box.
