

Smart car battery pack enters roundabout

I have a Smart EV coupe 2014 bought new in May 2014, as of now i have 20500 miles or 33000 km and i can notice battery life reduction. When i work i can charge the car free of charge and from 0% SOC to 100% my car would take 17.8KWh, now from 0% to 100% the car will only consume 15.2KWh (after every charge i get an email with the KWh that i consumed)

These are the best smart battery chargers for new and classic cars on sale today. Advancing technology means motorists need to take better care of their car batteries. These are the best smart ...

Intermittent and normal wiping still work after the car is off and the key's removed! I have never had or seen another car do this, have you? And worse, high speed wiping at bottom pull down position does a half wipe and just stops. I suspect, even though it is stopped, it may still be causing a drain on the 12v Battery.

Smart EQ Fortwo & Forfour Battery Charge Time. For the first gen Smart EV, recharge time to 80% takes four hours and 8 hours to 100%. For the second gen Smart EQ Fortwo and Forfour, the lithium-ion battery pack takes 3 hours to charge from 20 to 80 percent capacity with a standard 230 V outlet. It could also be charged using a common US ...

A smart charger or a keen eye and time goes a long way to speeding this up. Reinstall it, turn on the high beams for 10-15 seconds, then off. Then check the battery voltage. My guess is if you ...

Good day. I leased a 2018 Smart fortwo and bought it once the lease came to term. This is my second Smart EV and it's great for my use. During the lease there was apparently a 12v battery failure and the dealer replaced this free of charge. 2 years later it has happened again {(picture of battery)12v, Stop, See Operators Manual, Do Not Tow With Wheels On Ground}.

The Schumacher SC1280 is a beefy, cutting-edge battery charger. Blowing all the competitors out of the water with 15.0-amp rapid charging, this massive current will quickly bring your battery back ...

Ring smart car battery chargers have a multi-stage cycle that analyses, charges, protects and repairs batteries. This means that instead of just adding charge, the battery charger responds to the condition of the battery, then applies the fastest charge available. The repair function removes sulphate build-up on the battery plates. This is an ...
