Compare the features, pros, and cons of different solar chargers for various devices and scenarios. Find out which one is the best overall, budget, backpacking, and car charger based on our research and ...

The LT3652 is a multi-chemistry 2A battery charger designed for solar power applications. The LT3652 employs an input voltage regulation loop that reduces the charge current if the input voltage falls below a programmed level set by a simple voltage divider network. When powered by a solar panel, the input voltage regulation loop is used to ...
