How To Install Off-Grid Solar Power To A Cabin, Shed Or Barn With Ease. Let's face it, installing an off-grid solar power system to a small cabin, shed or barn can be a bit of a ...

Obviously, you'll need a solar panel. For this article, we're focusing on 100-watt panels, as they are extremely common for small solar setups. These panels are typically around 4' x 2' and produce - you guessed it - 100 watts of electricity in perfect weather. 50 watt and 150 watt panels are fairly common as well. Before choosing a solar panel, you need to think about ...

Dragging extension cords across the yard to power the string trimmer, fumbling around in a dark shed...most of us take these hassles for granted. But it doesn't have to be that way. With a day's work, you can run electrical lines to any part of your yard. If you want to wire your garage. Here's your guide to garage wiring!

A solar panel produces electricity from the sun and charges up a battery. The battery is used to power electrical things like light bulbs. A charge controller is needed so that the solar panels do not over-charge the battery and damage it. Solar panels come in many different wattages, depending on how much power you want to generate.
