Charging current that can be maintained indefinitely without the need for special cells or switchable battery chargers. Under normal circumstances, cells can be charged overnight in 12 to 14 hours. State of Charge (SOC)/Health (SOH)

Why do I need a special battery for the automatic start-stop system? Every starting process is associated with a large amount of energy from a car battery. The battery must be in a very good condition to reliably supply a high starting current. Especially with modern vehicles with automatic start-stop systems, the engine is switched off several times during the journey.
