

The battery can only last half a day

This process can sometimes fix a deeper software problem that may be draining your Apple Watch's battery life. Note: I only recommend performing this step after you've implemented the tips ...

So, now the problem I have is it just provide 2 hour of battery life sometimes 1 hour and a half only. Is there any solution for me, I have already seen all the dell support video on fixing battery life but it doesn't work at all. ... 2.5 hours is what I've seen the battery can last while playing GAMES. ... so you are not going to get day-long ...

Reviewers got several hours on battery with the 3060 version. Try changing the battery power settings to "better battery" and not power saver (I always found that drained more for some reason). Then in the Dell app choose the battery mode or "quiet mode."

I use a 100% battery-powered laptop almost every day (Pre-charging it, of course), so I understand it can start to deteriorate. But that's not the problem at all. Almost always after reinstalling Windows, my battery lasts well, as I said, about 4 hours. I do not know why, but after a while it can not stand more than 1 hour.

You go down to 30% (that's 50% down, aka half the battery capacity). If you charge it back to 80%, you use that 50% up again--that's half a cycle. You could use up 75% one day, 25% the next...
