

This process can sometimes fix a deeper software problem that may be draining your Apple Watch's battery life. Note: I only recommend performing this step after you've implemented the tips ...

So, now the problem I have is it just provide 2 hour of battery life sometimes 1 hour and a half only. Is there any solution for me, I have already seen all the dell support video on fixing battery life but it doesn"t work at all. ... 2.5 hours is what I"ve seen the battery can last while playing GAMES. ... so you are not going to get day-long ...

Reviewers got several hours on battery with the 3060 version. Try changing the battery power settings to "better battery" and not power saver (I always found that drained more for some reason). Then in the Dell app choose the battery mode or "quiet mode."

I use a 100% battery-powered laptop almost every day (Pre-charging it, of course), so I understand it can start to deteriorate. But that's not the problem at all. Almost always after reinstalling Windows, my battery lasts well, as I said, about 4 hours. I do not know why, but after a while it can not stand more than 1 hour.

You go down to 30% (that"s 50% down, aka half the battery capacity). If you charge it back to 80%, you use that 50% up again--that"s half a cycle. You could use up 75% one day, 25% the next...

Odd I got the update yesterday and im getting 31 hours. it says it will only last 1 day 4 hrs but is lasting me 1 day an 10 hours ... Same here, Pixel 6/Android 13/Watch 4 Classic, battery life basically dropped by half after ...

Same problem. After the last update the watch battery lasts for a few hours and I must charge it at least three times during the day. Last night it was charged at 100% before bedtime and woke up to 35% without being used at all. The companion I phone is always near it so I do not understand what is happening. I would appreciate your ...

Your smartphone battery over its lifetime degrades enough that in the same amount of time charging, a new phone could hit a full charge, while an older phone ...

So according to those numbers, I went around 3.5 hours active and 12.5 hours inactive, using only half the battery. So a power user using his phone for 7 hours a day would have enough battery for the day. A "normal" usage like I did, it would last until tomorrow late afternoon or evening approximately.

Odd I got the update yesterday and im getting 31 hours. it says it will only last 1 day 4 hrs but is lasting me 1 day an 10 hours ... Same here, Pixel 6/Android 13/Watch 4 Classic, battery life basically dropped by half after the OneUI 4.5 update.

Here's why your smartphone battery last for a day instead of weeks, and what to do to improve its life span. Constantly Recharging Your Smartphone Battery. Smartphone battery manufacturers claim ...
