While you'll need to replace a lead acid battery every 2-3 years and a lithium-ion battery every 3-5 years, a LiFePO4 battery can last up to 10 years. The other downside of LiFePO4 batteries is that they tend to be heavier and bigger compared to lithium-ion batteries. That's because they have a lower energy density.

4 · Despite its affordable price tag, it boasts a 36V 10.4Ah battery that packs a maximum range of 22 miles. That's pretty impressive - but the real magic happens in its real-world range. See, with most scooters,

The most affordable price and largest battery

you can expect 60-70% of their claimed maximum; yet under my grueling tests, the Pro achieved 87% with 19.04 miles. And that's not all, the battery is also ...
