Learn how to ship your batteries with our guide. Discover how to identify your wet or dry battery and how to secure them for shipping. Our guidelines for shipping lithium batteries will help make sure you meet all ...

Hi, I want to ship a lithium-ion battery to NZ to use in my electric bike. The bike I will take with me in the aircraft (without the battery). The battery is a Panasonic 26V, 250W and weighs several kilos. I have spoken to several shipping companies and they all say batteries are prohibited on flights.

Additionally, it is recommended to remove the battery and any external accessories before shipping to prevent them from getting damaged or lost. Another factor to consider when shipping your laptop is the temperature and humidity conditions during transit. Extreme temperatures or moisture can cause damage to the internal components of your laptop.
