Storing energy in a battery means you can power things for hours or days on end indoors or out. All without access to the grid. DELTA 2 lets you store 1kWh. In other words, it's a ton of energy to power your essentials. Unlike smaller batteries, it can keep refrigerators, phones, and even hotplates powered for extended periods.

A photovoltaic power station, also known as a solar park, solar farm, or solar power plant, is a large-scale grid-connected photovoltaic power system (PV system) designed for the supply of merchant power.

It is then used as the heated source, similar to a conventional power station. There are a few types of CSP power stations but all use the same principle of heating the working fluid by direct sunlight. The concentrated solar power plant or solar thermal power plant generates heat and electricity by concentrating the sun's energy.
