Essentially, these large hydrogen cartridges look like oversized AA batteries, and they jack into your car (or other power-needing device) to provide power.

## Where can I get new energy batteries nearby

So the NiMH ones are great, and here's what I bought, but switched to using this incredibly fast charger instead.. But I also tested some Li-ion AA's with charger (XTAR) here, and found it works great. Works better, even. It is more energy dense than the NiMH but also costs a lot more per battery. 1/3 more energy at 2-3x the cost. One of the chargers you can buy it with can also ...
