If you want to make it through a long commute or a cross-country flight without having to plug your tablet or gaming device in, you're going to need an external ...

I have an old 12V DC Brush Motor which its consumption is around the 12A, 13 A and I built a Battery pack, with two groups of batteries, (4S6P)+(4S6P), which makes a total pack with 14,8V 30A. To make this battery pack I used 18650 Samsung Cells 2600 mAh. I need your help, please. If you don't mind of course.
