## Why can't the battery be removed from the power supply

The battery is fully charged. The battery/power indicator light is flashing on the laptop. If I unplug the power adaptor, the laptop instantly turns off. All drivers are up to date. I've shutdown & restarted, also removed battery and tried to power up. I've run &quot;troubleshooters&quot; but no fault detected. Any help is appreciated.

Secondly, you do NOT hook a battery charger up to charge a battery by applying an alternate ground source, i.e. an engine block. The ground connection for a battery charger, used at a 2-4 amp rate (trickle charging) should ALWAYS be applied direct to the ground side post of the battery. Hence why, you remove the battery from the ...

This page has a good answer: &quot;it depends&quot;. The answer is: YES and NO, it depends on the situation. Having a battery fully charged and the laptop plugged in is not harmful, because as soon as the charge level reaches 100% the battery stops receiving charging energy and this energy is bypassed directly to the power supply system of the laptop.

Steps To Remove and Replace a Car Battery: 1: Gather Tools And Set Up Work Space; 2: Remove The Battery Cables, Connectors, And/Or Fasteners; 3: Lift The Battery Out Of The Car And ...

After a recent upgrade to Windows 8.1 Pro from W8, my laptop's (an ASUS X54H) screen turns off as soon as you remove the power cord. It turns back on with no issues when you plug the power back in. Keyboard and mouse input is processed while the screen is off.
