Automotive batteries are usually labeled as 12 volts, but they can hold close to 15 volts to accommodate the additional power received from the alternator. While your car is running, the battery voltage should register more than 13 or 14 volts. Most auto battery manufacturers also list reserve capacity (RC) or reserve power.

The following table is a cross reference of button cell batteries made by different manufacturers. Each column lists one or more manufacturer and each row lists the equivalent battery models for each manufacturer. The last two columns are names by the International Electrotechnical Commission (IEC). Button Cell Batteries on Amazon
